Outdoor rated					
Metal drum					
Plastic drum					
Same day shipping (usually)					

* 800W when cold 400W after warming up

- Select “waterproof” option for constant outdoor use

Some advantages of the insulated blanket over the “strap” or “band” type;

1. Lower energy usage (heats your product rather than the air)
2. Even heating (more surface area for your product to absorb the heat)
3. Heats the entire drum (less damage to your product)
4. The ambient conditions have less effect (more effective in cold climates)
